

BIOME MATCHING

The plants and animals that live together in a particular habitat are collectively called a biome. Earth has seven major biomes, each of which consists of unique plants and animals. Match up each biome below with one plant and one animal that are native to that habitat. If you need help, explore the biome resources at www.nationalgeographic.org/topics/resource-library-biomes.

RAINFOREST

Prairie dog

Cactus

CONIFEROUS FOREST

Palm tree

Fern

DECIDUOUS FOREST

Camel

Jaguar

GRASSLAND

Reindeer moss

Coyote

SHRUBLAND

Pine tree

Spotted owl

DESERT

Polar bear

Sage

TUNDRA

Wheat

Black bear
